

Epic Systems Corporation

Address: Wisconsin, Verona **Industry:** Information Technology
Date Posted: 2017-01-09

Epic makes software for mid-size and large medical groups, hospitals and integrated healthcare organizations - working with customers that include community hospitals, academic facilities, children's organizations, safety net providers and multi-hospital systems. Our integrated software spans clinical, access and revenue functions and extends into the home. How we're different: Epic's on-time, on-budget track record is one of the best in healthcare, as rated by independent reviewers. Epic software is quick to implement, easy to use and highly interoperable through industry standards. Information is shared securely in two ways: Care Everywhere, where the doctor controls the flow of data across organizations, and the Lucy PHR, where patients control their own health information. Why we're different: Founded in 1979, Epic is private and employee-owned. We develop, install and support all our applications in-house. Epic's leadership team includes clinicians, developers and process experts - people deeply experienced in patient care and healthcare technology.
